science

This week in Thames class they were looking at their third lesson on evolution where they designed their own plants that either lived in the desert or the artic . They had to give the plant different adaptations and how the adaptations help them survive .

Steam club

This week in steam club they added bird seeds to their bird feeders . They are going to hang them up outside for the birds to come and eat .

Mathematics

Computing

In Lea class they designed 3d houses on the computers they all looked amazing .

Maths

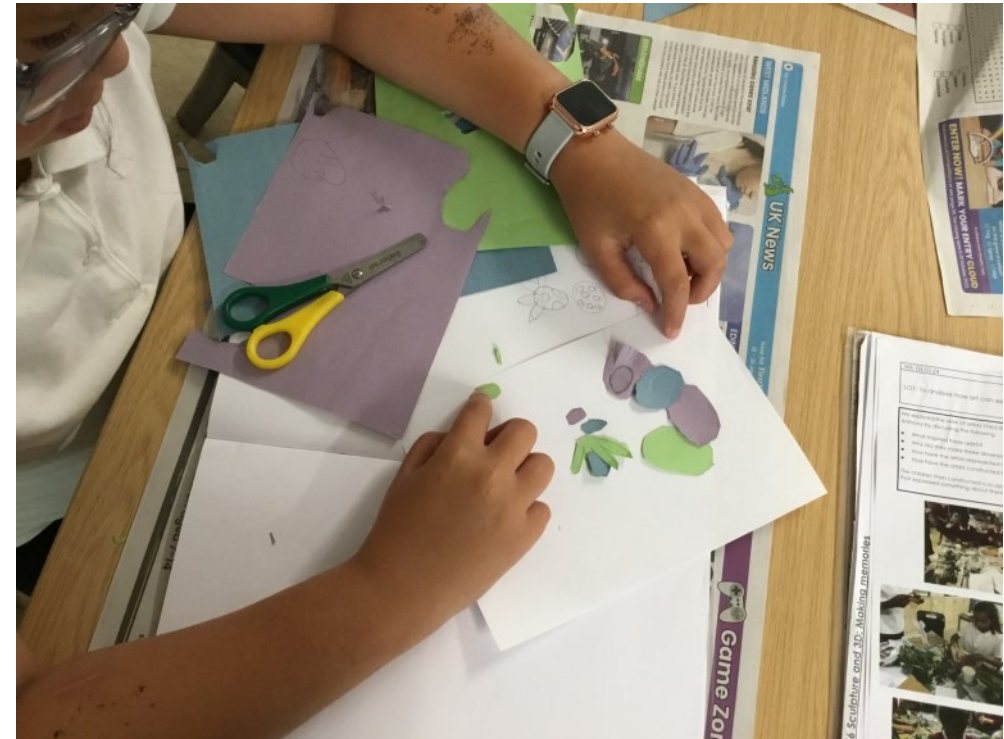

In year one Whale class, the children were investigating all about addition! They had arithmetic questions to answer, and they were very good at it! The questions were like $5+5$ $+5+5$, the children were very intelligent because they got them all correct!

On Thursday, the gardening and science ambassadors visited an apiary where they learned about both bee friendly plants and bees.

Half of them went into a room with a beehive in and had to try not to frighten the bees. The other half went through an orchard and learnt about plants and facts about gardening. Alexander stated that it was interesting to be with bees as they're one of his favourite animals.
